Hennig's SM Series Cable & Hose Carriers are designed for the most demanding applications in integrated mills, mini-mills, and foundries. Available in plated or stainless steel band construction with aluminum or steel components. The SM series is ideal for solutions in coke oven areas, sinter plants, melt shops, pickling lines, rolling mills and hot strip mills, cold mills, and many others.

HENNIG SM STEEL CARRIER FEATURES

- Longest unsupported spans in the market
- Aluminum or steel cross bars/covers
- Standard or custom widths (1 mm width increments)
- Vertical & horizontal cavity dividers (plastic or steel)
- Support rollers or glide shoes (for long travels)
- High quality zinc coated screws, pins & retaining rings
- Assembly/disassembly from inside & outside
