PROTECT YOUR SUCCESS

TELESCOPIC SPRINGS

Safe processes are profitable processes. We make our customers successful by protecting people and machines from the manufacturing environment and waste.

AT HENNIG, YOUR **SUCCESS** ALWAYS COMES FIRST.

Hennig Worldwide has been a global leader since 1950, specializing in chip and coolant management, machine protection, and facility safety. We work with a wide variety of manufacturers and other facilities worldwide, helping them create and maintain safe and efficient workplaces. Our commitment to excellence extends beyond our services—we actively contribute to local communities, create regional jobs, and support the global needs of machine tool customers.

PROTECT YOUR SUCCESS

Telescopic springs from our partners Arno Arnold offer exceptional conical protection for moving or rotating parts such as spindles, lead or ball screws, shafts, and columns. These versatile solutions can be efficiently utilized in various orientations—vertical, horizontal, and inclined positions. Continuous design improvements through user feedback has helped Arno Arnold develop approximately 1500 standard designs. These telescopic springs have been proving their capabilities in industries like general plant, mechanical engineering, machine tool construction, and more by protecting against swarf and thus prevent the premature wear of spindles, shafts and columns.

OVERVIEW

- Offered in blue polished spring steel or high grade stainless steel
- Space-saving, conical protection against hot chips for spindles, shafts, columns
- Maintains performance of your machine, minimizing downtime
- Long service life and low-maintenance
- Follows movement of machine through the force of the spring design
- Provides operator safety by sealing off pinch-points and other risks
- Designs for retrofit installations (spring steel only)

INSTALLATION

When installing vertically, it's important to mount with the larger diameter facing upwards. The overlapping windings ensure a secure installation and superior protection. This setup guarantees reliable performance and safeguards against potential issues.

Because our telescopic springs are supplied compressed and pre-stressed. Opening of the spring should only be performed under counter-pressure for safety reasons. After around 20 movements, the spring reaches full functional capacity.

MAINTENANCE

For long-lasting, optimal functionality, we recommend regularly cleaning and treating telescopic springs with a wet spray oil. This simple routine helps maintain the spring's performance, ensuring it continues to meet demands of practical operation over time.

Telescopic springs are shipped with a light oil film to ensure frictionless operation. At low travel speeds, this may result in a stick-slip effect which is harmless for operation.

TERMINOLOGY

Explanation of the abbreviations

da	outer diameter
di	inner diameter
Lmax	maximum length
Lmin	minimum length

CONNECTIONS

The attachment of the telescopic spring within the machine is enabled regardless of the installation location thanks to two centering flanges. The dimensions of these flanges can be seen on the next diagrams.

$$d_a + 6 \text{ mm} \leq C$$

$$0.6 \times L_{\min} \leq h \leq (L_{\min} - 2 \text{ mm})$$

$$a \leq (d_i - 4 \text{ mm})$$

$$0.6 \times L_{\min} \leq h \leq (L_{\min} - 2 \text{ mm})$$

OPTIONS

Select additional options and customize the spring to your requirements. Combinations and special individual solutions are also possible. We are happy to advise you further on the most suitable options for your desired level of protection.

Retrofitting for inaccessible spindles or shafts (installation guide must be respected).

The material used can be either blue polished steel or stainless steel.

The centering flanges are available on request.

PART NUMBERING

XXX

di
mm

XXXX

Lmax
mm

XXX

Lmin
mm

X

Installation
V = vertical
H = horizontal

X

Material
0 = spring steel band, polished blue
1 = high grade stainless steel
B = for retrofit installations (always made from polished blue steel)

Ordering Example:

025-0100-020 V 0

25 mm inner diameter; 100 mm maximum length; 20 mm minimum length; Vertical installation; Spring steel band, polished blue

|||| HENNIG®

PROTECT YOUR SUCCESS

WE'VE GOT YOUR BACK

Hennig Worldwide has been a global leader since 1950, specializing in chip and coolant management, machine protection, and facility safety. We work with a wide variety of manufacturers and other facilities worldwide, helping them create and maintain safe and efficient workplaces. Our commitment to excellence extends beyond our services—we actively contribute to local communities, create regional jobs, and support the global needs of machine tool customers.
