# WORKFLOW

COMBINING THE BEST IN CNC WITH THE NEWEST IN AUTOMATION

## WHY CHOOSE THE HENNIG WORKFLOW?

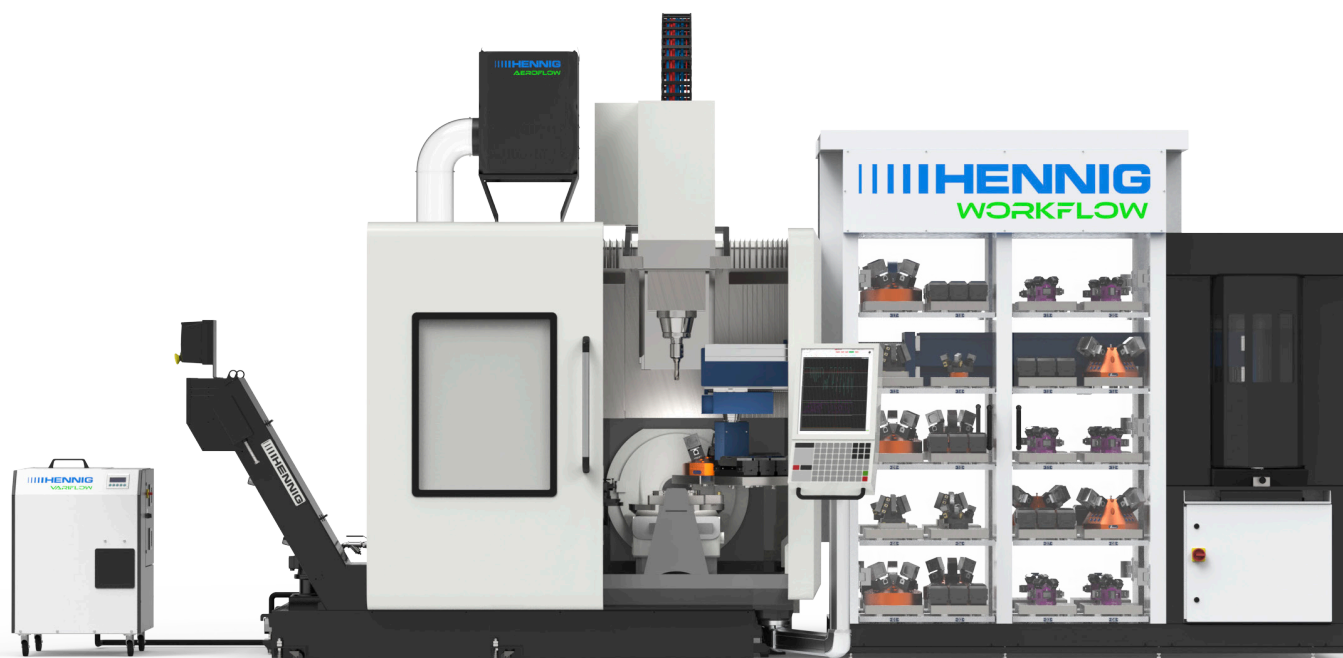

- **Compact yet powerful** | Premium automation in a small footprint, accessible for any shop.
- **Made in the USA** | Source parts, support, and service right here in the USA.
- **Complete ecosystem** | We deliver seamless integration of automation and machine tool support systems (chip conveyors, filtration, workholding, tool clamping systems, covers, enclosures, and more).
- **Workholding advantage** | Our automation is powered by our precision fixturing expertise.

**40**  
PALLET LOCATIONS

**300MM CUBE**  
WORK ENVELOPE  
ON THE PALLET

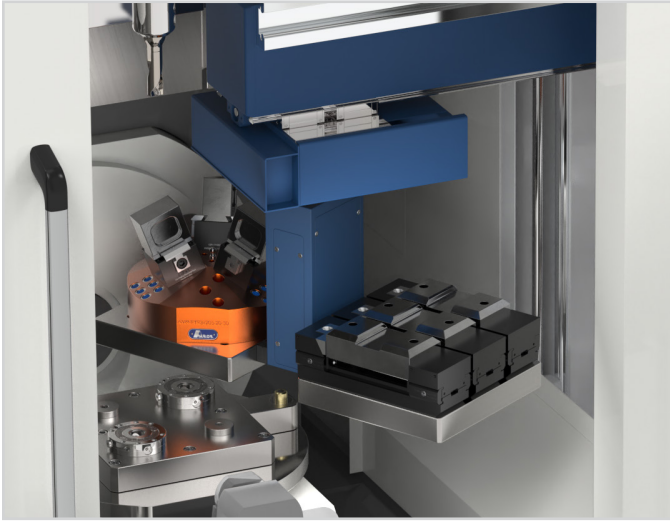

**125 LBS**  
WEIGHT CAPACITY  
ON THE PALLET

**40 SQ. FT.**  
10' x 4' FOOT PRINT  
ON THE SHOP FLOOR

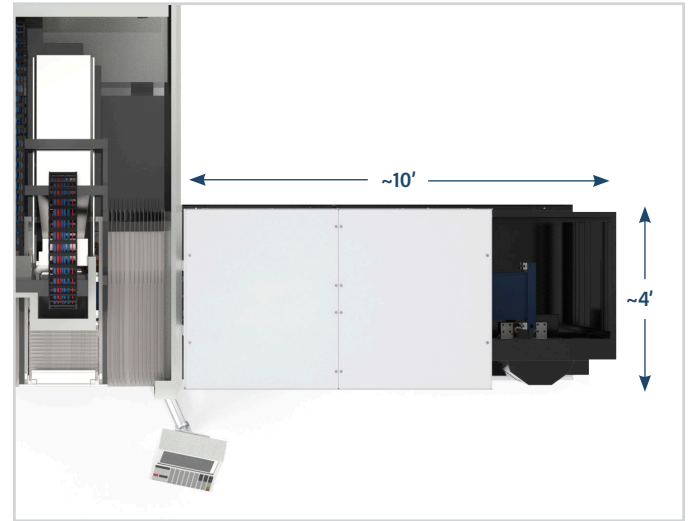

## QUICK PALLET EXCHANGE

Load arm holds two pallets for quick exchange of the completed pallet and the new pallet.

## SPACE SAVING, COMPACT DESIGN

An overall footprint of ~10'x4' is ideal for shops trying to maximize their shop floor space.

## MORE WORKFLOW ADVANTAGES

- **Lights-Out Machining** | Run a high-mix of work unattended, maximizing productivity.
- **Practical Design** | Reduces costs while providing reliability and premium aesthetics.
- **Simple Scheduling** | Easily change status of all pallets and order in any priority.
- **CNC Versatility** | Easily adaptable to many CNC machine tool brands and types
- **Retrofit** | Optimize your shop by adding automation to the machines you already have
